

Please maintain current regulations protecting internet neutrality. I do not want ISPs to diminish or degrade my service because I will not pay more money to get access. It is vital that all internet traffic be viewed as the same and treated as such. The internet is vital for daily living in the modern economy, everyone should be treated equally. The ISPs have proven they do not have their customer's best interest in mind. They only want to continue to make as much money as possible.
